

WHO WE ARE

Kwaan Bear Technology (KBT), founded in 2020 to prosper the Alaskan Kake Tribe, is an Alaskan Native Corporation (ANC) with Small Business Administration 8(a) certification. KBT provides boutique Information Technology (IT), Professional, and Program Management services to the Federal and commercial sectors including the Department of Defense, US Army Intelligence, Federal Bureau of Investigation, and The Pentagon. With direct experience in global projects in national security and critical infrastructure, we have earned the skills, partnerships, and certifications to meet client business needs and provide swift help with socio-economic contracting requirements.

WHAT WE DO

KBT delivers comprehensive solutions that address core technical issues, contracting options with ANC flexibilities and speed, and data management issues that modern programs entail—all with programmatic and business acumen to successfully manage projects.

HOW WE DO IT

First, we listen—then we follow our disciplined requirements identification and understanding process to determine the critical aspects of client problems and risks. We then swiftly create and deliver responsive solutions with our signature style: small-business flexibility backed by large-business capabilities.

SPECIFIC CORE CAPABILITIES

A young company led by principals who have supported every cabinet-level agency, KBT delivers services in Program Management, Mission Support, Cyber Security, and Staff Augmentation to execute government missions.

PROGRAM AND PROJECT MANAGEMENT

Services to assess performance, provide analysis, provide planning

Program & Portfolio Management

- Advisory and Assistance Services (A&AS)
- Systems Engineering and Technical Assistance (SETA)
- Performance Monitoring & Measurement
- Program Analysis/Reporting/PMO Services
- Risk Management & Mitigation

Acquisition Management

- Acquisition Lifecycle Support
- Business Case Analysis & Development
- Market Research & Procurement Strategy
- Other Transaction Authority (OTA) Support

Business-Financial Management & Strategy

- Budget Planning/Formulation/Execution & Monitoring
- Portfolio Management & Governance
- Enterprise Architecture & Performance Management
- Strategic & Organizational Planning
- Capital Planning and Investment Control (CPIC)

MISSION SUPPORT

Domain-focused IT solutions to supply chain management

Domain Support for Cybersecurity, Health IT, and Law Enforcement Analytics

- Information Assurance & Security Reqs Analysis
- Data Science & Analytics
- Security Certification & Accreditation Packages/Policy Development & Reg. Compliance Assessment
- Crypto Currency Tracking

Supply Chain

- Logistics Analysis & Support
- Medical Supply Sourcing
- Disaster Response: Planning, Preparedness, Response, Recovery
- Specialized Sourcing, e.g. Medical, Tactical, & IT

ADVANCED CYBER TECHNOLOGY & OPERATIONS

Cutting-edge technologies that solve our clients' challenges

Software (DevSecOps)

- Agile Development & Management
- Systems Administration, O&M
- Development/Planning/Execution, Solutions Architecture
- SharePoint Development

Data Integration & Management

- Cyber Security/Information Assurance
- Data Analytics & Strategy Planning
- Transformation & Standardization
- Documentation & Training
- Defensive/Offensive Cyber Capability

Special Applications & Networks

- Terrestrial and Space-Based Communications
- Line of Sight & Beyond LOS Wireless Comm. Systems
- LAN/WAN Support
- Sustainment & Modernization

SPECIALIZED STAFF SOURCING

Swift, expert staffing for all levels

- Cyber Security/Information Assurance
- Telecommunications Technicians/Engineer
- Network/Systems Engineers

- Program & Mission Support
- Program/Project Managers
- Computational & Data Scientists

- Software/Web/Database Developers/Architects/Admins
- AI/ML Engineers
- Enterprise & Data Architects/Data Analytics

COMPARISON: How ANC 8(a) Contracting Benefit Stakeholders

Traditional 8(a) Authorities

- ✓ Can receive sole source contracts—up to **\$4M for service contracts** (limited scale)
- ✓ Contract constraints limit subcontracts
- ✓ **Protestable awards**—which can add 3-6 months to actual contract start
- ✓ 51% of contract value (except construction) must be awarded to 8(a) company

In the Traditional 8(a) Procurement Process, early steps from developing the SOW through contract discussions require major time investment—often requiring a **12-18 MONTH timeframe**—and can increase likelihood of risk.

ANC 8(a) Authorities for Companies and Joint Ventures

- ✓ Can receive sole-source contracts—up to **\$25M for civilian agencies; \$100M for DoD components**
- ✓ Contract ceilings enable large-scale efforts and flexible subcontracting
- ✓ **Non-protestable awards**
- ✓ ANC Joint Ventures inherit ANC contracting authorities

The ANC Sole-Source Procurement Process precludes that cumbersome process, replacing it with a FAR-Approved SBA process that's protest-proof—a critical advantage since most programs and contracts are protested, which can add 3-6 months to actual contract start. **AN ANC CONTRACT CAN BE UNDERWAY IN DAYS.**

▶ ANC 8(a) FIRMS: Small Business, Large Capability—Multi-Stakeholder Benefit

- ✓ As a subsidiary of the Kake Tribal Corporation, Kwaan Bear maintains related working relationships that expand our past performance supporting Federal Agencies. In turn, the ANC community is afforded unique, highly flexible US federal contracting vehicles to execute fast-start, high-stakes programs.
- ✓ Strongly positioned as Strategic Partners, we assist government clients by teaming with niche companies to deliver specific solutions in a timely manner—which concurrently helps those firms enter the federal contracting space to deliver specialized solutions to government clients.

- **Swift Start-Up**
- **Enhanced Flexibility**
- **Minimized Schedule Risk**
- **Reliability**

▶ KBT PAST PERFORMANCE HIGHLIGHTS

 **US ARMY: Defensive Cyber Operations, Program Executive Office, Enterprise Information Systems (PEO EIS)**—Provide defensive cyber technology, support services, program management support, and continuous Integration and deployment of defensive cyber tools to Army Cyber protection Teams for the active-duty Army and National Guard.

 **US ARMY: Tableau Engineering Services**—Monitor and query the IT Service Delivery platform to analyze demand, usage, and performance. Use data analytics to provide timely, accurate, actionable reporting to improve service delivery and infrastructure management, and conduct proactive problem and incident management.

 **Federal Bureau of Investigation: Virtual Security Support Services**—Provide artificial Intelligence SW using Bayesian algorithms to identify, trace, and gather for exploitation intelligence related to the illicit use of virtual currency through tracking and attributing virtual currency transactions.
